RELEASE PLAN

SHARE YOURSELF ARTISTS

High Level Goals

- Business Statistics and Recommendations
- UI/UX Improvements (Search, filters, ordering data)
- Group system for businesses/blogs (access codes, art submissions assignment)

User Stories

- Sprint 1 - (Total story points : 113)

    - As an artist, I would like to see a list of recommended businesses, so that I can submit my artwork to businesses that are most likely to respond to me. (9)
    - As a developer, I need to implement a standard testing method, utilizing a testing framework, in order to automate testing functionalities. (15)
    - As an artist, I would like to have an interaction with the detailed list of businesses to be able to select from, with statistics and other information to make a informed decision. (20)
    - As a business, I would like my submissions page to be sorted and displayed conveniently to be able to easily navigate through my submissions. (13)
    - As a developer, I would like to make the recommendations tabs more appealing and fix the design so that the website is more appealing and organized. (32)

- ○ As a business user, I would like to be able to search by art title, so that I can find the piece I would like to review.(24)

- ● Sprint 2 - (Total Story Points: 107)

  - ○ As a business member, I would like to have a page to sign-up to join a business. (11)
  - ○ As a developer, I want to create access codes for each business and authenticate the person signing up properly. (13)
  - ○ As a developer, I want to create a new collection in the database to hold data about each business group, group member, and further business information, so that I can implement usable functionality for business group. (14)
  - ○ As a business group user, I would like to be connected to the business's features including dashboard and submissions, so that I can access my business's functionality. (16)
  - ○ As a user, I would like be able to move through different art pieces that exist within the user stories dashboard, when visiting the art and viewed_art pages. (39)
  - ○ As a business group user, I would like to be able to search by artist name, so that I can find which art piece I would like to review. (14)

- ● Sprint 3 - (Total Story Points: 90)

  - ○ As a developer, I would like to create two tabs called available and reserved so that a business can assign artist submissions to any group member to review the artist submission. (24)
  - ○ As a business, I would like to track the business member that responded to the submission, so that review requests are more organized and tracked. (7)
  - ○ As a business member, I would like to see who else is in my business group, so that I can assign review requests to them and keep everyone accountable. (13)
  - ○ As a business group user, I would like to have a dashboard and side panel that can help me navigate through my tasks. (13)
  - ○ As a business, I would like to allow group members to assign submissions to themselves, so that multiple people can be working on reviewing submissions together. (15)
  - ○ As a business member, I would like for the social media icons to direct me to the right links, so that I can access my company's social media pages directly. (8)
  - ○ As a business group member, I would like to be able to respond to art pieces, so that artists can have responses for their submissions. (10)

- Sprint 4 - (Total Story Points: 125)

  - As a user, if I land on the website and I am not already signed in, I would like to be able to sign-in to my account. (11)
  - As a user, I would like to have the click-area to be more accurate, so that I can have a better idea of where my clicks are going to take me. (2)
  - As an artist, I would like to see correct percentages for my business recommendations, so that I can see accurate statistics from the businesses I will submit to. (5)
  - As an artist, I would like my list of submissions to be sorted into pages instead of one long scrollable list, so that it is more convenient to find my art. (10)
  - As an artist, I would like my dashboard layout to be more consistent wherever I route to on the website, so that I can have an improved user experience. (11)
  - As an artist, I would like to be able to consistent navigate through my own pictures or any other artist's pictures using the arrow buttons, so that artists can easily navigate through other artists' dashboards. (13)
  - As a developer, I would like the page where businesses can search by artists to have a compact UI. (6)
  - As a business, I would like there to be a way to create a new business where business members can join that business using my assigned access code. (10)
  - As a business group member, I would like to be able to be view submissions and business members when I first join a business, so I can immediately be informed about the business and review submissions. (11)
  - As a business group member, I would like my member dashboard to retain the data when I refresh, so I can still view the data whenever I want. (10)
  - As an artist, I would like to be able to add categories to my art piece, so that I can edit the categories of an existing piece after first uploading. (10)
  - As a business, I would like to be able to keep track of received art pieces for a specific category, so that the data can be used to recommend my business to artists. (10)
  - As a developer, I would like to fix the bug that occurs when a business member tries to access their profile, so that a business member can see their profile information. (5)
  - As a business member, I would like to be able to have the right information displayed after clicking things like the refresh button, so that I will not have to worry about the web page breaking if I happen to misclick. (11)

Product Backlog

1. Comment Chain to respond to art pieces
   a. Currently, users are able to comment on art pieces, but it does not display.

b. We would like to implement a nice UI where users can upvote, downvote and display the number of likes/dislikes.
2. Allow users multiple ways to pay for credits. (paypal, apple pay, credit/debit, etc)
3. Album System
   a. Be able to group pictures into a single portfolio for artists to organize their collection
4. Multiple device responsiveness
5. Utilize a testing framework.
